

MONDOTM

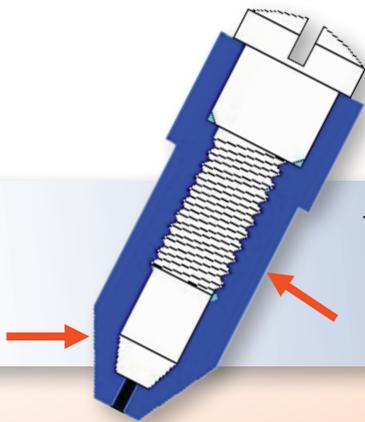

Polymer Technologies

Experience the new standard in rotational-molded buoys that exceed the rigorous demands of the commercial marine industry.

- Strongest rope eye in the industry
- Ideal for use with shackles
- Superior valve design, conveniently located in the rope eye for increased durability
- Single valve system for ease of inflation and deflation also helps prevent leaks and stripping
- Available in a range of colors & sizes

Mondo Polymer Commercial Buoys are ideal for use by commercial fishermen and as fenders by pleasure craft owners. Manufactured from the highest quality marine grade vinyl and first introduced by Norfloat USA, Mondo Buoys feature improved single valve system for easy inflation and the prevention of leakers. Heavy-duty molded rope eyes feature a larger radius, combining strength and stability with less wear-and-tear, even if you're using shackles.

The improved valve design found in the commercial line of buoys and fenders incorporates a newly designed seating surface and increased thread length to prevent leakage and to help prevent strip-out.

Heavy-duty, extra-large molded rope eyes won't rip out, even under the toughest conditions.

Mondo Hydrofloat Commercial Buoys

Available in three popular sizes

The Mondo Hydrofloat (Low-Drag) Commercial Buoy offers features you won't find anywhere else:

- More surface area above water for **Better Visibility**
- **Floats Higher** in the water than standard round buoys.
- **No Ribs** to gather seaweed.
- **Less drag** in tidal waters
- **Easier** to pull through the water
- **Easier on Equipment and Crew**
